Address: H no 11 A Atulanchal, Janki Nagar, Jabalpur, MP, 482002 Contact no.- +91-8368829267

Career Objective: Dedicated and results-driven Developer and Team Lead with a strong track record of creating solutions for any given user scenario and ensuring code with best practices and of excellent standards. Seeking to leverage expertise in Power Platform, Data Analytics and Product Management to contribute to the success of a dynamic organization

EDUCATION

SRM Institute of Science and Technology, India

2018-2022

Bachelors in Technology, Computer Science Engineering

CERTIFICATION

Microsoft Certified: Power Platform Fundamentals

2023

WORK EXPERIENCE

Capgemini India, Noida

Sept 2022 - Current

Associate Consultant

- **Development and Production of B2C Application For 10+ Countries:** Contributed to the solution design of Canvas Applications, utilizing Dataverse as the primary data source for the Collection Module. Played a key role in backend development, leading a team of over 10 members to ensure seamless functionality and efficient process automation. Utilized a diverse range of tools and technologies, including Power Automate, Dataflows, Excel Scripts, SharePoint, API Integration, Azure Pipelines, Logic Apps, and Azure Functions, to streamline workflows, enhance performance, and deliver impactful solutions.
- **AI Builder POC and Implementation:** Developed a Proof of Concept for a prediction model that secured client approval and facilitated its successful implementation across 8+ countries. Mentored and trained multiple team members in the associated technology, fostering skill development and knowledge sharing. Additionally, implemented document processing models to extract entities and efficiently store them in Dataverse tables, enhancing data accessibility and usability.
- **Requirement Gathering, User story Grooming:** Assisted the consulting team as a Technical Consultant by effectively understanding and gathering client requirements. Translated these requirements into well-defined user stories for the development team, ensuring seamless collaboration and facilitating robust solution design and implementation.
- **Resource Training and Knowledge Sharing:** Trained resources and newly onboarded team members on processes, management practices, Dataflows, and reporting, enabling them to quickly adapt and contribute effectively. Stayed current with industry best practices and regulations, empowering the team to address challenges with confidence. Provided actionable insights to enhance code security and integration standards. Successfully facilitated CMMI audits, ensuring strict adherence to code and data recording standards while maintaining the accuracy and confidentiality of client data.
- **Power Automate and Tools Integration:** Developed numerous Power Automate flows in direct collaboration with clients, effectively translating requirements into automated solutions. Streamlined processes ranging from small tasks to complex, time-intensive jobs previously performed manually. Utilized, developed, and integrated advanced tools such as custom connectors and OpenAPIs via HTTPS to address use cases requiring specialized attention, ensuring optimized performance and client satisfaction.

- **Production Support:** Contributed significantly to the successful deployment of applications and processes into production, ensuring seamless transitions with minimal disruptions to ongoing operations. Provided consistent and reliable support to the support team, proactively assisting in the resolution of any issues that arose post-deployment. Developed detailed, well-documented guides and procedures, facilitating a smooth handover and ensuring that the team could efficiently manage, maintain, and troubleshoot the solutions with ease. This approach ensured long-term sustainability and optimized operational performance post-deployment.

HighRadius, India

June 2021 – Jan 2022

Product Analyst Intern

- **Managed a portfolio of 10 clients** by gathering and understanding their expectations, and translating them into actionable insights for the Machine Learning teams. Collaborated closely with both clients and teams to ensure data was effectively understood and used to create models that aligned with client goals. This process ensured that the developed models met the specific needs of each client, resulting in highly tailored and impactful solutions.
- **Developed Payment Prediction Models** for multiple high-profile clients, including L'Oréal, Coca-Cola, and others, to accurately forecast the timing of payments for their ongoing invoices. These models utilized historical data and advanced analytics to provide clients with actionable insights, enabling them to better manage cash flow and anticipate payment schedules.
- **Led new hire orientations, Trained and Received multiple Awards** while working for both Product Management and Data Analyst team.

Skills

Power Automate, Power Platform, Dataflow, Dataverse, SharePoint Online, Excel Scripts (TypeScript), DBMS, ASP.NET, Power Query, DAX, TypeScript, Python, SQL, C++, C#
